

Residential Supports

Residential supports include a variety of living arrangements made possible through varying levels of staff support.

Residential Options include:

- **Group Homes** with different staffing levels to meet the needs of the individuals living there. Generally staffed at a high level, often with staffing 24 hours per day.
- **Supported Individualized Living (SIL)** where individuals are supported in smaller settings with staffing support up to 20 hours per week, depending on individual need. More independence is needed for Supported Individualized Living.
- **Supportive Homeshare** where support is provided in a family home of an unrelated caregiver. It is similar to a boarder relationship.
- **Individualized Funding** where a family can create a Personal Plan for an individual.

How To Apply

You must have a Lead Agency to register for Residential Supports. Your Lead Agency can put you on the waitlist for Residential Supports. Priority status is assigned based on a number of factors including age and health of caregiver.
